RIPE NCC Billing Procedure 2025 Published

15 Nov 2024 • news

If you want to see how your annual contribution will be calculated or find payment information, please refer to the [RIPE NCC Billing Procedure 2025](#), which is now published.

The [RIPE NCC Charging Scheme 2025](#) introduces changes to fees for independent resources held or sponsored by members.

In addition to the service fee covering all IPv4 and IPv6 allocations, there is:

- A €25 increase for Internet number resource assignments, such as IPv4 and IPv6 Provider Independent (PI) assignments.
- A new annual fee of €50 for each Autonomous System (AS) number.

We are currently preparing our members' invoices and expect to send them to all members at the beginning of 2025.
