General Information for UPC4056381/D-LinkIn_9f:59:a4

IDENTITIES	
SSID	UPC4056381
BSSID	bc:0f:9a:9f:59:a4
Manufacturer OUI	BC-0F-9A
Manufacturer	D-Link International
SECURITY	
Type	WPA2-Personal
Capabilities	[RSN-PSK+FT/PSK-CCMP][ESS]
RF / SPECTRUM	
Beacon	frequency 2,437 GHz channel 6
All channels used	4, 5, 6, 7, 8
Channel width (current)	20 MHz
Channel width (max)	20 MHz
PHY CAPABILITIES	
Supported technologies	N144, g54 , b11
Basic rates	1, 2, 5.5 , 11 Mbps
Additional rates	6, 9, 12, 18, 24, 36, 48 , 54 Mbps
Supported HT MCS	0-15,32
SU-MIMO	2x2
ADDITIONAL CAPABILITIES	
BSS Transition (BTM 802.11v)	Supported
Fast BSS Transition (FT 802.11r)	MDID: 0x5254; FT over DS Supported
Radio Management (RM 802.11k)	Supported
Management Frame Protection (MFP 802.11w)	Not supported
Fine Timing Measurement (FTM 802.11mc)	Not supported
Multi-Link Operation (MLO 802.11be)	Not supported

Operational Information for UPC4056381/D-LinkIn_9f:59:a4

SIGNAL STRENGTH	
TX power	19 dBm
RSSI	-62 dBm
LOAD	
Airtime utilization (self reported)	14.1%
Airtime utilization (channel; now)	36%
Airtime utilization (channel; MA10)	37%
Associated client stations (self reported)	0
Associated client stations (channel; now)	2
Associated client stations (channel; MA10)	2

MLO Information for UPC4056381/D-LinkIn_9f:59:a4

MLO	Not applicable for this signal's technology
-----	---

Networking Information for UPC4056381/D-LinkIn_9f:59:a4

Not associated with this signal.

Phy models for UPC4056381/D-LinkIn_9f:59:a4

WiFi Phy Rx Speed Model (Access Point to Device)

Signal not modelled yet.
The model will automatically start building upon connection to this signal.

WiFi Phy Tx Speed Model (Device to Access Point)

Signal not modelled yet.
The model will automatically start building upon connection to this signal.
