The chart displays the distribution of execution times for the 'get' operation. The x-axis represents time in milliseconds (0ms to 100ms). The left y-axis shows the percentage of operations (0% to 100%). The right y-axis shows the percentage of operations (0% to 100%). The chart features a line graph with open circles representing the cumulative distribution and a bar chart with green and orange bars representing the frequency of operations at specific time intervals.
